**LETTER OF RECOMMENDATION**

I know Nikhil for 4 years as a student when he was pursuing bachelor's degree in our university. It gives me a lot of pleasure to recommend Nikhil for master's at your prestigious university.

Nikhil is a sincere and dedicated student with great motivation to excel in his chosen field of studies. He has been consistent in his academics. During his years at our university, though he was majoring in a branch not related to Computer Sciences, he always had an additional interest in computers and their evolution & history. In the 1<sup>st</sup> year, he has always shown excitement in coding and used to solve puzzles through his coding skills using the subject knowledge of 1<sup>st</sup> year CS subject's curriculum. He used to come to me whenever there was a required clarification on certain subject.

Besides this, Nikhil has shown a keen interest in learning Python and HTML which were not a part of his course curriculum. His demonstration of programming in C in 1<sup>st</sup> semester and usage of aptitude in the code challenge platforms like HackerRank proves he's championing the art of learning new things and put them in practice. I strongly believe these abilities were the solid reason that gave him a rightful career path in the field of Information Technology and secured him a Software Engineering job in the same. He is doing great at his job for 3 years now. His ability to visualize and link together the fundamentals of each subject makes him an ideal student for research. I have a strong opinion that he has possessed the right aptitude to do well in MS program. I endorse a master's degree that would further boost his granular knowledge in computers. Looking at my students in the past, I'm certain that the course curriculum provided at your university is an ideal platform for Nikhil to further his knowledge in the subjects of computers, software engineering and IT. He is also an athletic personality who represented his department at several venues.

I recommend him an admission and financial assistance in your esteemed university.

I wish him grand success in all future accomplishments.

Regards,  
Dr. Ch. Satyananda Reddy
